Profile

I am a senior front-end developer with extensive experience specializing in developing and implementing the user interface (UI) and user experience (UX) of a website or application. I have advanced skills in React/Next, Vue/Nuxt, JS/TS and other web development technologies and strong leadership and communication skills. I can translate design mockups into functional, responsive web pages and manage multiple projects simultaneously. My role is providing an effective and engaging user experience that meets end-user needs and supports business goals.

Employment History

Senior Front-End Engineer, Jean Francois, Ontario

May 2022 — January 2023

- Created and implemented charming and interacting Betting Game UIs for decentralized betting site.
